# 1. Introduction

- Versatility of the Application
- Problem Identified :
  - People find it hard to get new inspiration and are often left clueless on what to cook.
  - The age old, traditional recipes are overlooked or almost forgotten.
- Solution Proposed :
  - The application offers it's users wide range of recipes.
  - It also allows them to introduce the once lost recipes and also share their own customised recipes .

## 2. Objectives

The User can

1. Add the recipes
2. Edit the added recipes
3. Update the recipes
4. Save the recipes
5. Search for recipes

### 3. Scope

1. Can be used by a broad range of users.
2. Can be used by Parents.
3. Can be used to save recipes.
4. Can be used by people trying to improve their cooking.

## 4. Feature /Functionality

1. Registration and Login option :
  - User have to register for the first time and login next time.
2. Add the Recipe :
  - Users can add recipes.
3. Viewing Recipes:
  - Users can view recipes.
4. Updating Recipes:
  - Users can update recipes.

## 5. Outcome of Project

1. User Can log in.
2. User can view for other user's recipes.
3. User can add a recipe by providing the following:
  1. Ingredients.
  2. Procedure.

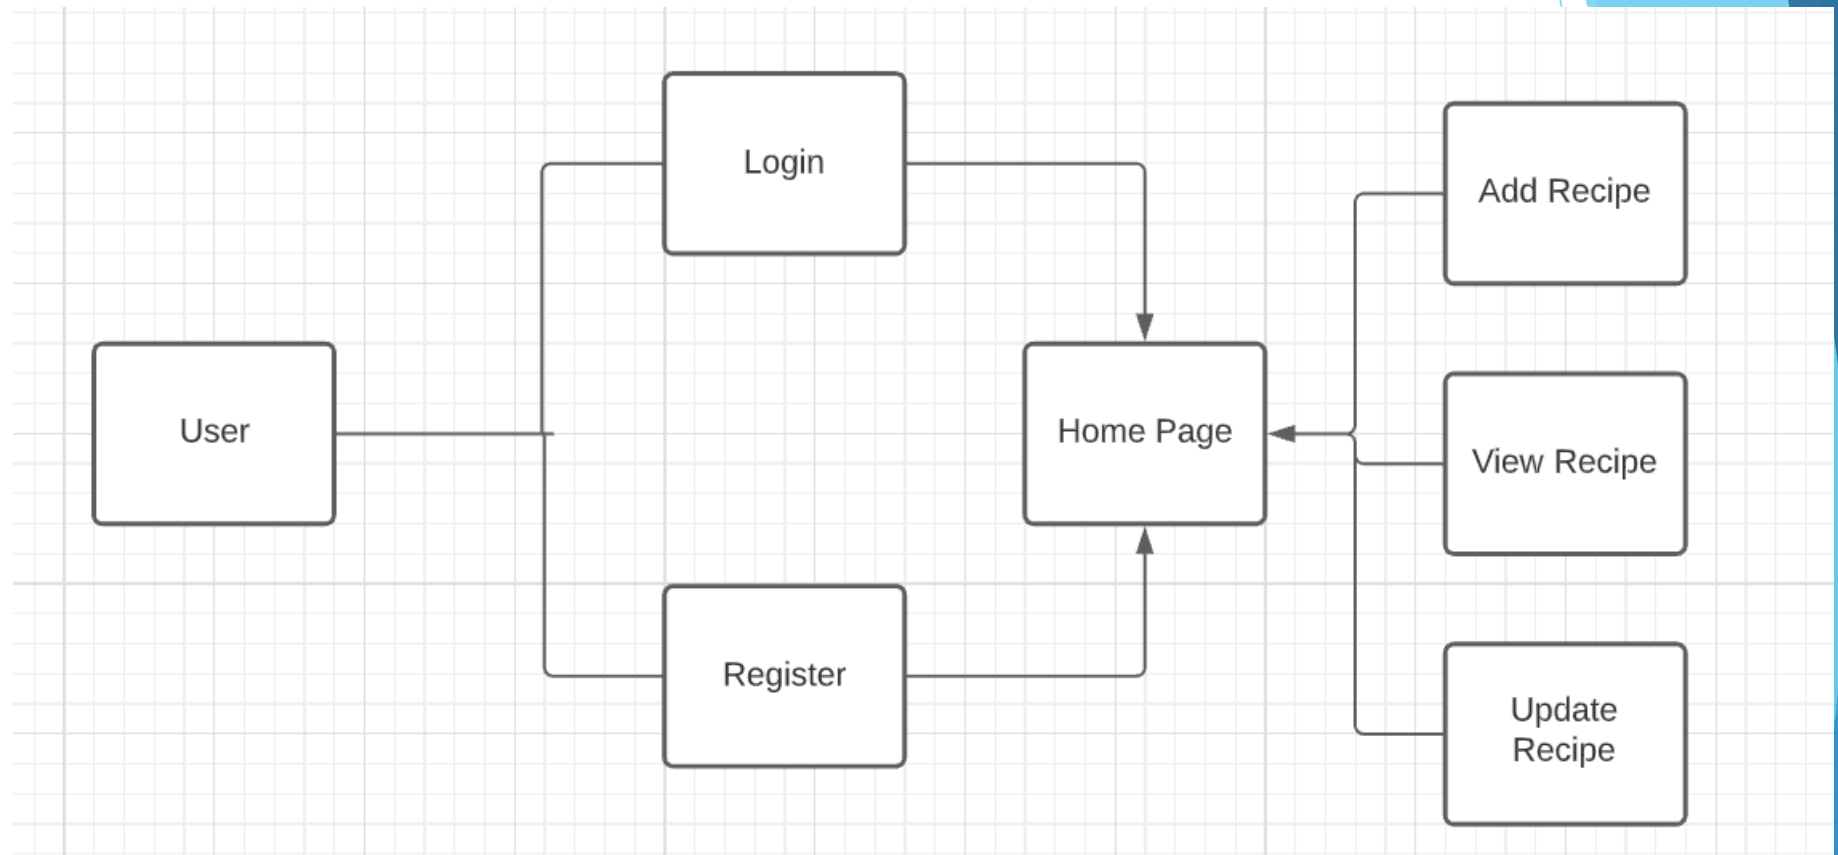

## 6. Technology Stack

- Programming language : Java
- Operating System: Windows 10
- Development Environment : Apache Netbeans
- Database : MySQL
